

SkillUp – Sprint 1 Individual Contribution Statements

Project: SkillUp

Course: CS 4390/5388 – Software Project Management

Sprint: 1

1. Isaac Padilla

Role: Software Engineer

Date: 09/21/26

Individual Contributions

Business Strategy:

- Wrote the Strategy-to-Project Chain section.
- Collaborated with team to brainstorm Project Charter's Business Objective section.
 - Gathered and organized the team's ideas into a structured Business Objective section for the Project Charter.

Front-End Development:

- Developed the Home Page for the SkillUp Living Project Portal based on my initial design ideas.
- Added my assigned sections to their corresponding website pages.
 - Added Strategy-to-Project Chain and Market Research content to site.
- Added my information on the About Us page.
- Added individual contributions section.

Market Research:

- Collaborated with the team to develop interview questions for the Recreational Activity Tracker project
- Five interviews with potential users about recreational activities, motivation, progress tracking, and personal development.
- Five interviews for the Picture Exploration project.
- Wrote the "What Didn't Work / What You Pivoted From" section, documenting abandoned ideas, findings and changes to original SkillUp project.

Additional Contributions:

- Assigned tasks and responsibilities to team members.
- Reviewed the Sprint 1 requirements to find necessary deliverables and website content.

Review Responsibilities

- Reviewed Project Charter sections completed by other team members.
- Reviewed the Market Research sections (Top Pick, Aggregate Findings)
- Checked About Us is complete

AI Use Disclosure

AI Tool Used: ChatGPT

PM AI Protocol Stage: Interviews and Review

Purpose of AI Use:

- Used to convert handwritten notes to markdown content. It was also used to cleanup notes.
- Used to check for any grammar issues and inaccurate information.

AI Tool Used: Antigravity

PM AI Protocol Stage: Building Website

Purpose of AI Use:

- Used to build website home page by creating the scrolling interactions and adding the title and images.
 - Created the Individual Contributions section on the website
 - Used to transfer documents to the website.
-

2. Karina Rivera

Role: Software Engineer

Date: 09/21/26

Individual Contributions

Front-End Development:

- I initialized the file structure and established the overall structure of the website. I created the navigation bar and the pages accessible through it. I also structured the Sprint 1 page to include all the necessary sections and files.

User Experience Design:

- I created a website with a clean and modern interface that allows users to switch between light and dark modes based on their preferences. I also contributed to the initial layout of the About Us page to display information about all team members.
- To improve the overall user experience, I organized all sprint pages into a dropdown menu within the navigation bar to prevent the navigation bar from becoming too crowded. This makes it easier for users to navigate to their desired sprint page while keeping all sprint pages easily accessible.
- Additionally, for the Sprint 1 page, I added a secondary navigation bar to make it easier for users to navigate between the different sections within the page.

Additional Contributions:

- During the market research phase, I contributed to developing interview questions for our second highest-ranked project idea, the Budget Simulator. During this phase, I also conducted 10 different interviews and analyzed the responses to help the team make a final project selection.

Review Responsibilities

- During the first phase, I reviewed the interview questions developed for project ideas. At the end of the market research phase, I reviewed the interview responses and discussed the findings with the team to help determine which direction we would take based on the feedback we received.
- For the project deliverables, I reviewed my teammates' responses when needed and assisted with any additional questions regarding the project or its deliverables.

AI Use Disclosure

AI Tool Used: ChatGPT

PM AI Protocol Stage: Team Living Portal Development

Purpose of AI Use:

- I used AI to help establish a consistent website theme for both light and dark modes, develop the team member grid layout, and resolve an overlapping issue between the primary and secondary navigation bars on the Sprint pages.
- **Changes or Rejected Output:**
The page layouts were improved based on AI-suggested changes. I reviewed and adjusted the suggestions as needed to fit the website's design and project requirements.

3. Juan Reyna

Role: Market Researcher

Date: 09/21/26

Individual Contributions

Market Research:

- Collaborated with the team to design questions for phase 1 and phase 2
- Conducted 5 interviews regarding one of the domain's, specifically the planner with photos as proof
- Conducted another set of 5 interviews regarding recreational activities
- Wrote the Top Pick Deep Dive, the reason why we chose to stick with SkillUp, along with the evidence from the interviews to support it.

Project Requirements and Scope:

- Worked on the scope boundary, including the In's, Out's, and Deferred's
- Included the necessary features that will help support the idea of what SkillUp is
- Left out unnecessary features that will not help achieve the goal of SkillUp
- Deferred list for features that may help, but not top priority.

Additional Contributions:

- Helped fill in missing content from the website
- Reviewed sprint 1 requirements for missing tasks

Review Responsibilities (What I Reviewed)

- Reviewed project charter
- Reviewed About us section

AI Use Disclosure

AI Tool Used: ChatGPT

PM AI Protocol Stage: Living Portal Development

Purpose of AI Use:

- Used for easier transition from document content to website
-

4. Jonathan Hernandez

Role: Market Researcher

Date: 09/21/26

Individual Contributions

Market Research:

- Worked with the team to develop and refine the interview questions used throughout Phase 1 and Phase 2 of our market research.
- Conducted 5 interviews during Phase 1 focused on recreation activities to better understand people's experiences, motivations, difficulties, and how they currently approach recreational activities.
- Conducted another 5 interviews during Phase 2 focused on recreational activities to gather additional feedback and further validate the direction or vision of our idea.

Charter Success Criteria:

- Wrote the Success Criteria section within the Project Charter
- Helped define what would need to be achieved for SkillUp to successfully meet the goals established through our research and project planning.

Additional Contributions:

- Wrote the Aggregate Findings section, bringing together the research from our different ideas, interviews, and product comparisons to explain the patterns we found and how we narrowed our ideas down to the SkillUp concept.

Review Responsibilities (What I Reviewed)

- Reviewed project charter section in website
- Reviewed About us section in website

AI Use Disclosure

AI Tool Used: ChatGPT

PM AI Protocol Stage: Living Portal Development

Purpose of AI Use:

- Used to easily pass information from documents to the website in the correct format.
-

5. Ricardo Morales Perez

Role: Tester & Checker

Date: 9/21/26

Individual Contributions

Website Testing:

- I tested the website to make sure the website works perfectly by visiting every page of every section, making sure that no error occurs when going to a specific page.

Issue Identification and Reporting:

- For now, there aren't any errors I detected that were on the website, but if the website does contain any errors, I make sure to tell my team to fix them.

Additional Contributions:

- I oversaw doing the constraints part of Sprint 1 I need to any constraints about our website

Review Responsibilities

- I reviewed that all the constraints were there and made sure there weren't any errors in the work.

AI Use Disclosure

AI Tool Used: ChatGPT

PM AI Protocol Stage: Constraints

Purpose of AI Use:

- Just to get more ideas to add for the constraints part of the assignment but the work is my own

Changes or Rejected Output:

- I improved my Constraints part because I felt it was short. So, I just used ChatGPT in order just to get more ideas and then I come up with my own ideas with example ChatGPT gave me
